**PRE-K TEACHERS; MRS. CAVUTO, MISS CAHILL PREK
NEWSLETTER FOR THE WEEK OF SEPTEMBER 19, 2016**

This week we will start our first Interdisciplinary Units of Study, “Welcome to Pre-K”. Our focus question this week is “What will I learn and do in Pre-K?”

Together, we will help the children adjust to the pre-k program. In the beginning weeks, we will introduce the school routines while fostering their social and language skills. We will create a nurturing atmosphere in which we will present a wide selection of appropriate literature. We will observe, as well as, assist our students in improving their fine and gross motor skills. Our students will develop an understanding of a variety of mathematical concepts through play as they solve problems, manipulate materials, and experiment with their own ideas. The students will experience several work choice areas, centers, in the classroom. In addition, they will be introduced to various art techniques.

Many exciting explorations into nature and science will take place in the upcoming months.

Please remember to:

- Label your child’s belongings.**
