Middle School Choice. The middle school admissions process aims to provide students with the opportunity to choose a middle school that suits their interests and needs. All students are to submit an application indicating their middle school preferences. Students are eligible to apply to middle school in the district where they are zoned for middle school, and, when different, the district where they attend elementary school. There are also borough-wide and citywide options. Please consult the middle school directories for district-specific information and to find out more about your options. The middle school admissions timeline is the same regardless of your district.
